To Stan Chatman <stanchat@tccons.com>

Greetings Stanley,

Thank you for your interest in Microsoft Azure AI Facial Recognition. We have reviewed the application you sent on 11/30/2025, and your application has been approved for the following use case:
[Face API] Facial Identification (1:N or 1:1 matching) with optional facial liveness detection for personalization to enable ambient environment personalization with consent-based facial recognition that enriches experiences on shared devices. For example, hot desk screens and kiosks in the workplace and home can recognize you as you approach to provide directions to your destination or jumpstart hands-free interaction with smart meetings devices.

You now have access to the capabilities for the following subscription(s). If you need access for other subscriptions, please submit a new application with the subscription IDs and use case.
727b8b0c-6e34-42f6-a70a-6881a3f42f11

Access to liveness detection requires the Azure AI Vision Face Client SDK. To get access to the SDK release artifacts, follow these instructions.

If you are a new user who needs help getting started, follow these instructions.

If you have any questions or feedback about the application process, please email us at csgate@microsoft.com, or simply reply to this email.

Thank you,
[Azure Cognitive Services]Azure Cognitive Services
